To Whom It May Concern,

I would like to take this opportunity to highly recommend The Fence Company, LLC. Their professionalism and dedication was evident prior to the bidding process as their Owner, Ms. Gina Donisi, paid more visits to our project site and ask more questions about our needs and requirements than other contractors. The Fence Company's installation crew easily complied to our safety standards, security measurements, and time requirements working late in the evening and over night.

The Fence Company's resulting bid was the lowest; the results were outstanding and the project came in on time and within budget. With our specific needs and concerns about the product's load bearing strength and resulting safety standards within the Toyota plant, The Fence Company collaborated with and advised our team and engineers to find the perfect product to meet our unique needs. The Fence Company's ability to pay attention to details and fulfill our needs and requirements with a small work crew, provided a win-win situation for Toyota/North America Parts Center Kentucky.

In summary, we are extremely pleased with the work and relationship we have made with The Fence Company. Should you need any other information, please contact me directly.

Sincerely,

Michael Stiles
